

# Make-up Tips

Tips for applying your stage make-up.

**\* Foundation** - Similar colour match to your skin. Make sure that it is not too pale, because under the stage lights it will make you look sick. It should be applied and evenly spread over the face using a make-up sponge. Take care to blend down the neck so that no harsh lines can be seen.

- Using a powder puff, powder the entire face and brush off the excess with a large brush

**\* Eyes** - with a brown eye pencil draw a line onto the eyebrow working from the centre of the face outward. Blend the colour with a cotton tip.

- using brown tone eye shadows apply a base of a light camel colour to the lower lid. Just under the eyebrows use a white eye shadow. Then apply a dark brown in the socket line ('c' shape) and blend slightly upwards.

- Using black eye liner, draw a thin line close to the lashes along the eye lid, slightly flicking up towards the outer corners of the eyes. Still with the black eye liner, draw a thin line along the bottom of the eye just under the lashes.

-Apply black mascara to the top and bottom lashes. Optional to glue false eyelashes to enhance the eyes.

**\* Blush** - With a blusher brush apply pink blush to the cheekbone and blend up towards the hairline. Add white eye shadow to highlight top of blush line.

**\* Lips** - Trace the line around the lips in a Australis 'Allure' lipliner or Revlon Colorstay Lipliner - Berries colour lip liner (or similar colour to lipstick)

- Using a lip brush fill in the lips with Rimmel Lasting Finish '212 Amethyst Shimmer' or Satin Lipstick # 11
